

HASAMI PORCELAIN™ THE GREY COLLECTION

2023.10.4 RELEASE

Ten years after Hasami Porcelain's launch in Japan, the brand has announced the release of the Grey Collection. Simple in composition, the collection of plates, bowls, mugs and trays explores new forms of expression. A palette of greys highlights the textures of both material and glaze, while the brand's signature simplicity, usability and individuality remain ever-present. Marking the start of a new chapter for Hasami Porcelain, the Grey Collection presents a sharp, sophisticated take on familiar forms.

DETAILS

THE GREY COLLECTION

GRAZE

The grey colour palette is central to the collection, beginning with the material itself. Black pigments are blended into the porcelain base, which possesses a sophisticated, concrete-like expression. The inner surfaces are coated with either ash white or dark grey glaze, contrasting the vessel's exterior and enhancing its tactile charms.

WEIGHT

Based on Hasami Porcelain's signature modules, the plates and bowls are produced with around 50% less material than the original line. The result is familiar forms with a delicate touch and lightweight feel. This atmosphere also extends to the mugs, which feature a redesigned handle with a rounded form.

RICHLITE

Complementing the ceramic tableware is a series of Richlite trays in black and dark brown. Made from high-grade recycled paper infused with a thermosetting resin, the Richlite material is durable and hygienic, while also possessing a natural, paper-like texture.

HASAMI PORCELAIN™

Porcelain has been produced in Hasami for the past four centuries. Building on this heritage, Hasami Porcelain was born under the direction of Takuhiro Shinomoto. Clean lines, organic textures and multifunctional designs define the brand's tableware. Inspired by traditional jubako tiered boxes, the modular products can be easily stacked for efficient storage. Passing through the hands of various craftspeople during the course of production, each piece is finally stamped by hand, completing its truly unique character.
